## Introduction

This report has been prepared by the City of Edmonton in accordance with Alberta's [Automated Traffic Enforcement Technology Guideline](#). This report provides all required data and information as specified in Section Q - Annual Public Report of the guideline and demonstrates the main guiding principles behind the use of Automated Traffic Enforcement (ATE) in Edmonton. This report also describes the automated enforcement program measures and targets that align with long term transportation safety outcomes as outlined in Section D - Transportation Safety Outcomes of the Guideline.

The City of Edmonton is committed to achieving Vision Zero, the internationally recognized goal of zero traffic-related fatalities and serious injuries, through safe and livable streets by 2032.

Safe speeds are fundamental to achieving this goal by giving people more time to react to the unexpected, reducing crash frequency and severity, and increasing the driver's field of vision. Automated enforcement, including Mobile Photo Enforcement (MPE) and Intersection Safety Devices (ISDs), are proven countermeasures to reduce speeding, therefore playing an important role in combination with other safe mobility programs to make streets safer and more livable for all. Research to investigate the safety impacts of MPE conducted by the City of Edmonton's Research Chair in Urban Traffic Safety at the University of Alberta has shown that efficient and effective strategic deployment of MPE reduces both speed and crashes, underscoring the significance of this tool for improving traffic safety.<sup>1</sup>

<sup>1</sup>Agina, S., Momeni Rad, F., El-Basyouny, K. Linking Deployment Outcomes to Program Impacts for Mobile Photo Enforcement. *Safety*, 2023, 9, 88. <https://www.mdpi.com/2313-576X/9/4/88>

## Safe Mobility Strategy 2021 - 2025

The City of Edmonton's *Safe Mobility Strategy 2021-2025* is an innovative approach designed to accelerate our journey to Vision Zero.

The [Safe Mobility Strategy](#) sets out deliberate actions to address the systemic factors that contribute to serious crashes, including unsafe speeds. In Edmonton, safe speeds are encouraged through a combination of measures including driver feedback signs (DFS), engineering upgrades, education and awareness campaigns, and automated enforcement in coordination with in-person enforcement by the Edmonton Police Service (EPS). The locations with predominant speeding and red light problems are selected for automated enforcement after in-depth traffic analysis and consideration of engineering and design standards.

'Strategic Collaboration with the Edmonton Police Service' is a Key Action in the *Safe Mobility Strategy*, which includes supporting the strategic location selection and scheduling of both in-person traffic enforcement and City-led automated enforcement.

## Automated Traffic Enforcement Technology Guideline

In response to revisions to the [Automated Traffic Enforcement Technology Guideline \(2023\)](#) and in 2021, the City of Edmonton established new processes and made the following changes in practice:

- Data collection and annual reporting was addressed by collecting the average daily traffic data at all locations and implementation of supplementary equipment where traffic data during deployment was not available.
- All sites that were previously approved based on 'conventional enforcement by the EPS deemed unsafe,' 'complaints from community members' criteria, and locations where the speed limit is less than 50 km/h (with the exception of designated playground zones (PGZs) which have a speed limit of 30 km/h, and construction zones) were deactivated and removed from deployment schedule.
- Ticket review software was updated to ensure only one ticket can be issued to the same vehicle within a five-minute period.
- The new site approval process with accompanying datasets was developed to comply with the new requirement and site assessment form supplied in the revised guideline. As a result, 560 mobile speed enforcement sites and 105 Intersection Safety Device locations were approved by EPS. In addition, the site assessment for each site, outlining the reason and criteria for selection and approval was posted at [edmonton.ca/enforcement](https://edmonton.ca/enforcement) through the [Safe Streets Map](#).
- In 2024, a total of 280 automated enforcement sites were renewed, including 179 Mobile Photo Enforcement sites and 101 Intersection Safety Device locations.

In December 2024, the Government of Alberta announced additional changes to automated traffic enforcement to take effect in 2025, with new guidelines publicly available on April 1, 2025. These include prohibiting photo radar on all provincial highways, restricting photo radar to school zones, playground zones, and construction zones, and limiting Intersection Safety Devices (ISDs) to red light enforcement only.

## Automated Enforcement Summary

Automated traffic enforcement is deployed in Edmonton at approved sites in accordance with the Automated Traffic Enforcement Technology Guideline set out by the Province of Alberta. The City's automated enforcement program is delivered and managed by the Safe Mobility Section within the City Operations Department with oversight and direction from the Edmonton Police Service. The program consists of Mobile Photo Enforcement, photo radar and photo laser units which move among active enforcement sites, and Intersection Safety Devices, which are deployed at fixed locations.

Please find below a summary of the outcomes of the City of Edmonton's automated enforcement program for 2024, prepared by the City of Edmonton Safe Mobility Section.

## Mobile Speed Enforcement

The City of Edmonton operated 18 photo radar units and 17 photo laser units to enforce speeding violations at approved automated enforcement sites in 2024.

Significant efforts have been made to ensure that the City's automated enforcement program is transparent and focused on safety. Mobile speed enforcement vehicles have bright yellow wraps or decals to be more visible to drivers and are parked so that they can be seen without obstruction by the direction of traffic they are monitoring.

Edmontonians may:

- Explore the [Safe Streets Map](#) which shows all automated enforcement sites, mobile speed enforcement sites, Intersection Safety Device locations and their site assessments
- Read the [2023 Automated Traffic Enforcement Annual Report](#)

The deployment of available automated enforcement visits across eligible, approved sites is carried out through the application of an optimization tool designed by the University of Alberta. The tool considers several factors for each site and provides the optimal distribution of visits to maximize the safety impact. The factors considered by the deployment tool for each site include:

- Frequency and severity of crashes
- Frequency and severity of vulnerable road user crashes
- Speed compliance rates
- Number of speed complaints filed by residents
- Number of children and seniors in the area
- Historical violation rates

## Mobile Photo Enforcement General Statistics

To assess the impact of mobile speed enforcement, traffic flow data, violation rates, ticket numbers and crash data for 2021 to 2024 were gathered for each site, as provided in [Appendix '1'](#). General statistics for the mobile photo enforcement program are summarized in Table 1 below.

There are a number of key highlights related to the performance and outcomes of the mobile photo enforcement program in 2024:

- Strategic deployment of available automated enforcement sites to distribute site visits in order to maximize the safety impact.

- The total number of enforcement sites remained consistent between 2023 and 2024, although enforcement sites on Anthony Henday Drive were deactivated and replaced with additional playground zone sites and construction zone sites, in accordance with Provincial Guideline changes in December 2023.
- There was a 2.9 per cent increase in the total number of hours of enforcement, due to the contractor meeting or exceeding the required operating hours in 2024.
- The number of violations, tickets, high-speed violations (21 km/h or more above the speed limit), and violations per hour decreased substantially in 2024, largely due to the deactivation of enforcement sites on Anthony Henday Drive in December 2023. Specifically, between 2021 and 2023, violations on high speed roadways (speed limit of 100 km/h) accounted for 38% of total violations and 54% of high-speed violations. In contrast, in 2024, violations on high speed roadways accounted for less than 1% of total violations and high-speed violations due to the smaller number of sites being enforced on high speed roadways.
- The violation rate (number of violations per hour of enforcement) in playground zones increased slightly compared to 2023, although the violation rate for 2024 is lower than the previous three-year average (2021-2023).
- Enforcement in playground zones has continued to increase since 2019, both in terms of the number of sites visited and the hours of enforcement.
- The number of vehicles receiving multiple tickets per year decreased in 2024, which is also due to the deactivation of Anthony Henday Drive enforcement sites. Between 2021 and 2023, an average of 32 per cent of repeat violators committed at least one violation on a high speed roadway (100 km/h). These violations were no longer captured in 2024.

**Table 1. Mobile Photo Enforcement General Statistics (2021 - 2024)**

	Year	2021	2022	2023	2024
<b>MONITORED</b>	Total Sites Visited <sup>2</sup>	535	475	422	420
	Total Hours	53,016	54,749	56,203	57,857
	Number of Vehicles Monitored <sup>3</sup>	7,282,519	8,446,403	22,489,100	24,714,884
	Playground Zone Sites Visited	220	262	278	288
	Playground Zone Hours	10,353	13,313	17,764	21,247
<b>SPEED</b>	Total Violations*	140,287	139,491	165,300	117,653
	Total Tickets*	120,110	113,248	135,442	94,288
	Ticket Conversion Rate	85.6%	81.2%	81.9%	80.1%
	Violations per Hour	2.65	2.55	2.94	2.03

<sup>2</sup> In 2022, there was a decrease in the number of sites visited (compared to 2021) due to the fact that the City ceased enforcement at 174 sites with a speed limit of 40 km/h in accordance with Provincial Guidelines. The number of sites visited was further reduced in 2023 as more sites were deactivated in 2022 due to the new site criteria specified in the 2021 Automated Traffic Enforcement Technology Guideline, as well as roadway and LRT construction impacting the ability to actively enforce those areas. No new sites were added due to a Provincial moratorium on creating new sites.

<sup>3</sup> There was a process change related to tracking vehicles monitored. In 2023, some equipment was upgraded to ensure that all passing vehicles were monitored, in accordance with Provincial Guidelines. The increase in vehicles monitored between 2022 and 2023 reflects this change in process and equipment.

HIGH SPEED (21+)	High Speed Violations 21+ km/h Over the Speed Limit	19,384	21,691	27,918	12,549
	Total Speeding Tickets 21+ km/h Over the Speed Limit	15,739	16,787	22,256	9,182
	Violations per Hour	0.37	0.40	0.50	0.22
PLAYGROUND	Playground Zone Violations	21,360	22,916	25,320	33,252
	Playground Zone Tickets	19,305	20,014	21,274	28,750
	Violations per Hour	2.06	1.72	1.43	1.56
REPEAT	Number of License Plates Receiving Multiple Tickets	14,463	13,227	17,492	10,108
	Maximum Number of Tickets per 1 License Plates	21	18	20	20

\*A violation is defined as a vehicle captured exceeding the threshold speed on a given roadway. A violation results in a ticket only following a thorough review process whereby a determination is made to issue a ticket to the registered owner of the offending vehicle.

Table 2 below illustrates the impact of mobile photo enforcement (MPE) on speeds, traffic volumes and violations. In 2023 and 2024, MPE was deployed to the same 388 sites for at least one hour; 271 of the sites were in playground zones and 117 were along roads with speed limits ranging from 50 km/h to 100 km/h.

The playground sites showed mild decreases in speeding indicators, including a decrease in the violation rate by 0.04 violations per hour, a decrease in average speed by 0.49 km/h, and an increase in the average compliance rate by 1.2%.

The sites outside of playground zones showed an overall larger decrease in speeding indicators, including a decrease in the violation rate by 0.51 violations per hour, a decrease in average speed by 0.69 km/h, and an increase in the average compliance rate of 2.8%.

**Table 2. Changes in Speeds, Traffic Volumes and Violations at MPE Sites (Changes from 2023 to 2024)**

	PGZ	Other*
<b>Number of MPE Sites in Both 2023 and 2024</b>	271	117
<b>Average Change in Monitored Vehicles per Hour</b>	+18.9	+73.5
<b>Average Change in Violation Rate</b>	-0.04	-0.51
<b>Average Change in High Speed Violation Rate</b>	-0.02	-0.10
<b>Average Change in Average Traffic Speed</b>	-0.49 km/h	-0.69 km/h
<b>Average Change in Compliance Rate<sup>4</sup></b>	+1.2%	+2.8%

\* Includes sites outside of PGZs that were enforced in both 2023 and 2024 for at least one hour.

<sup>4</sup> Compliance Rate is the percentage of vehicles travelling at or below the speed limit.

Interpreting Crash Statistics

In September 2022, Collision Reporting Centres (CRCs) were launched in Edmonton, which marked a significant change in the crash data collection and reporting process for residents as well as for how collision data is managed and reported. This change has impacted collision data, and data availability and reporting in two ways:

- The number of minor injury crashes reported in 2023 and 2024 has increased greatly compared with previous years, due to the self-reported nature of collisions and kiosk questions at CRCs. Collision report data from CRCs differs in consistency and accuracy from the data previously received from EPS.
- There have been increased delays in receiving collision reports processed through the CRCs. As a result, not all 2024 crash data has been finalized to date.

Changes in traffic volumes have also impacted crash trends. At the start of the COVID-19 pandemic in 2020, Edmontonians were asked to stay home as a public health safety measure. Therefore, 2020 and 2021 represent outlier years in terms of reduced vehicle volumes and crash numbers. For that reason, the three year average (which includes 2021) may be artificially low.

Because 2024 crash reports are still being received and entered at the time of submission of this report, it is difficult to assess the change in crash numbers; however, the first quarter of 2024 and previous years have been provided to show a comparison between years. Table 3 below shows a comparison between Quarter 1 (Q1) data for 2021-2023 (yearly average) and Q1 for 2024.

Preliminary analysis shows an increasing trend in total crashes at automated enforcement sites, with a 23 per cent increase in total crashes in Q1 of 2024 compared to the Q1 three year average for 2021-2023. This is consistent with city-wide trends, where there has been a 19 per cent increase in total crashes, comparing Q1 2024 to a Q1 average for 2021-2023.

Table 3. Crash Statistics for Mobile Photo Enforcement Sites

Crash Type	2021-2023 (Yearly Average)	2024*	2021-2023 (Q1 Average)	2024*
	Full Year Data		Quarter 1 only (January - March)	
Total Crashes	830	967	195	240
Fatal Crashes	1	1	0	0
Major Injury Crashes	13	17	2	3
Fatal and Major Injury Crashes	14	18	2	3

\*2024 crash numbers are subject to change due to delays in receiving and finalizing reports.

## Intersection Safety Devices

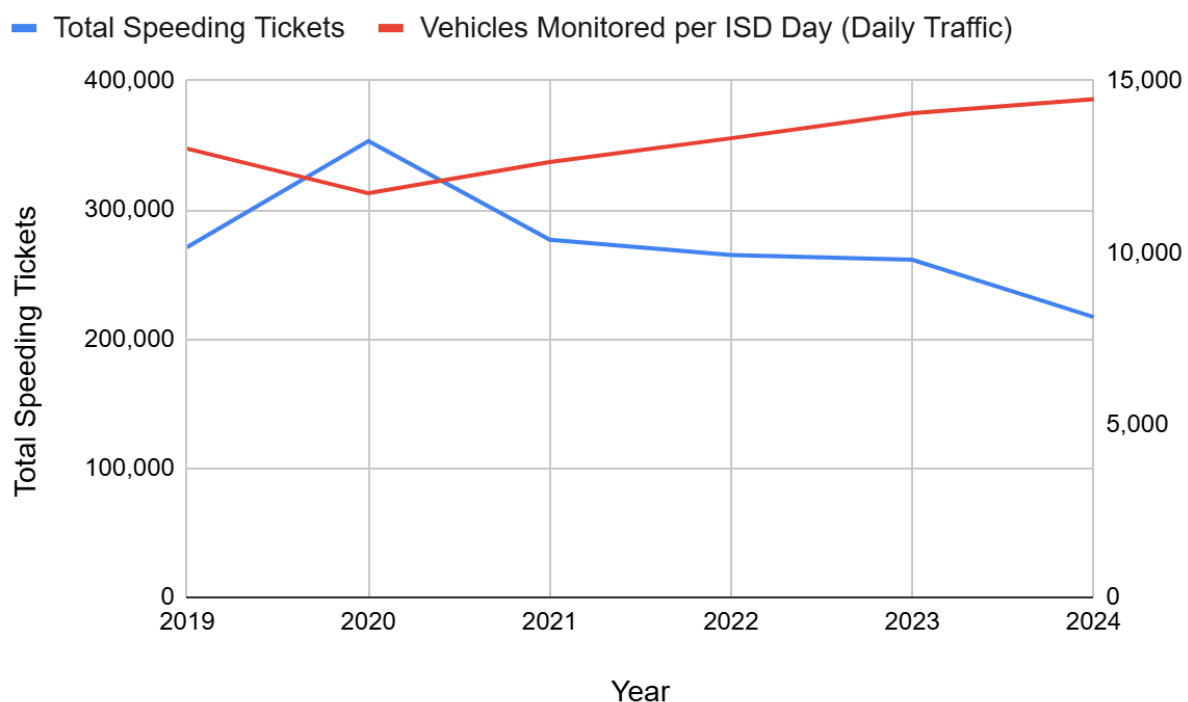

Intersection Safety Devices (ISDs) are installed at 89 locations/approaches (63 intersections) to enforce red light running and speeding.

### Intersection Safety Device Statistics

In order to assess the impact of ISDs, traffic volume data, violation rates, ticket numbers and crash data for 2021 to 2024 were gathered for each site, as provided in [Appendix '2'](#). General statistics for the Intersection Safety Devices are summarized in Table 4.

There has been a steady decline in a number of key indicators including speeding tickets per daily traffic (vehicles monitored per ISD day) and high speed tickets (21+ km/h over the speed limit) per daily traffic. These decreases coincide with an increase in the daily traffic (the number of vehicles monitored per ISD day). In other words, as traffic volume increases, speeding decreases. Figure 1 below shows a visual representation of the number of speeding tickets and daily traffic between 2019 and 2024.

**Figure 1. ISD Speeding Tickets and Daily Traffic**

There was a decrease in daily traffic (number of vehicles monitored per ISD day) in 2020 due to COVID-19 restrictions; however, the number of vehicles monitored per ISD day has increased steadily over the past four years.

Red light violations are more variable and tend to be highly affected by weather conditions, such as snowy and icy road conditions. There was a high number of red light tickets in 2022, which could be attributed to higher than average snowfall in January and November of that year. In contrast, there were fewer red light violations in 2023, which could be attributed to lower than average snowfall in January, November and December of 2023. Red light violations in 2024 increased as compared to 2023, but were 2.5 per cent less than the three year average (2021-2023) for red light violations.

There was an increase in the number of red light tickets issued in 2024 due to a higher conversion rate (i.e. a higher percentage of violations that became tickets).

There was a decrease in the number of vehicles that received multiple speeding tickets from ISDs in 2024. This is consistent with the overall decrease in speeding tickets seen in 2024. In contrast, there was an increase in the number of vehicles that received multiple red light tickets, as compared to 2023. Again, this is consistent with the overall number of red light tickets issued in 2024, as compared to previous years.

**Table 4. ISD Sites General Statistics (2021 - 2024)**

	Year	2021	2022	2023	2024
MONITORED	Total ISD Days	37,667	35,954	33,253	32,120
	Number of Vehicles Monitored	476,181,954	479,328,213	467,620,678	464,729,835
	Vehicles Monitored per ISD Day (Daily Traffic)	12,642	13,332	14,063	14,469
SPEED	Total Speeding Violations	330,041	330,988	331,902	271,321
	Total Speeding Tickets	276,973	265,141	261,384	217,110
	Speeding Violation Conversion Rate	83.92%	80.11%	78.75%	80.02%
	Speed Tickets per Daily Traffic	21.91	19.89	18.59	15.01
HIGH SPEED (21+)	High Speed Violations 21+ km/h Over the Speed Limit	17,825	18,382	19,172	16,847
	Total Speeding Tickets 21+ km/h Over the Speed Limit	11,891	11,553	11,632	10,621
	Speed Tickets 21+ per Daily Traffic	0.94	0.87	0.83	0.73
RED LIGHT	Total Red Light Violations	62,315	67,465	48,936	58,073
	Total ISD Red Light Tickets	28,211	32,201	22,706	31,345
	Red Light Violation Conversion Rate	45.27%	47.73%	46.40%	53.98%
	Red Light Tickets per Daily Traffic	2.23	2.42	1.61	2.17
REPEAT	Number of License Plates Receiving Multiple Speeding Tickets	49,403	46,508	44,900	35,456
	Number of License Plates Receiving Multiple Red Light Tickets	1,175	1,445	848	1,435

\*A violation is recorded when a vehicle is captured exceeding the threshold speed or running a red light on a given roadway. A ticket is issued for a violation only after undergoing a comprehensive review process, whereby a determination is made to issue a ticket to the registered owner of the offending vehicle.

Table 5 provides average violation rates and speeds per site between 2023 and 2024 and demonstrates the impact of ISDs on speeds and driving behaviour. During this time, nearly one billion vehicles were monitored by ISDs across the city. The results are as follows:

- The average speeding violation rate per site dropped by 12.8 violations per 100,000 vehicles
- The average speeding violation rate for 21+ km/h over the speed limit per site decreased by 0.55 violations per 100,000 vehicles
- The average red light violation rate per site increased by 2.64 violations per 100,000 vehicles
- The average traffic speed per site dropped by 0.8 km/h

**Table 5. Change in Average Violation Rates and Speeds (from 2023 to 2024)**

<b>Average Change in Speeding Violations (per 100,000 Vehicles per Site)</b>	-12.8
<b>Average Change in Speeding 21+ km/h Violations (per 100,000 Vehicles per Site)</b>	-0.55
<b>Average Change in Red Light Violations (per 100,000 Vehicles per Site)</b>	+2.64
<b>Average Change in Average Traffic Speed (per Site)</b>	-0.8 km/h

**Interpreting Crash Statistics**

Tables 6 and 7 provide the crash statistics at ISD locations for both the full intersection and the monitored direction of travel, respectively. Comparing the first quarter of 2024 to a three year average of Q1 (2021-2023), there was a 7 per cent increase in crashes at ISD monitored intersections. This increase is lower than the city-wide trend of a 19 per cent increase in total crashes, comparing Q1 of 2024 to a three year average of Q1 2021-2023.

Overall, for the full intersections, there was an 18.5 per cent increase in fatal and major injury crashes (full year) when compared to the three year average. However, when looking only at the monitored direction of travel, there was a 17 per cent decrease in fatal and major injury crashes.

**Table 6. Intersection Crash Statistics for ISD Sites**

<b>Intersection Crashes</b>	<b>2021-2023 (Yearly Average)</b>	<b>2024*</b>	<b>2021-2023 (Yearly Average)</b>	<b>2024*</b>
	Full Year Data		Quarter 1 only	
<b>Total Crashes</b>	2,768	1,601	678	726
<b>Fatal Crashes</b>	1	0	0	0
<b>Major Injury Crashes</b>	26	32	5	3
<b>Fatal &amp; Major Injury Crashes</b>	27	32	5	3

\*2024 crash numbers are subject to change due to delays in receiving and finalizing reports.

**Table 7. Through Lane Crash Statistics for ISD Sites**

Intersection Through Lane Crashes	2021-2023 (Yearly Average)	2024*	2021-2023 (Yearly Average)	2024*
	Full Year Data		Quarter 1 only	
<b>Total Crashes</b>	863	521	212	232
<b>Fatal Crashes</b>	0	0	0	0
<b>Major Injury Crashes</b>	9	8	1	1
<b>Fatal &amp; Major Injury Crashes</b>	10	8	1	1

\*2024 crash numbers are subject to change due to delays in receiving and finalizing reports.

## Automated Enforcement Targets

The City of Edmonton's Traffic Safety Plan tracks three performance measures for the automated enforcement program which are:

- Repeat violators: the percentage of license plates that had at least one ticket from the current quarter and had at least one ticket in the past year. A decrease in the percentage of repeat violators would suggest that receiving a ticket may be effective in changing a driver's behaviour, despite the delay between the behaviour and receiving the ticket.
- High speed violations: the percentage of total violations that exceed 21+ km/h over the speed limit. A decrease in high speed violations would indicate that fewer drivers are travelling at excessive speeds.
- Location impact: the percentage of total deployment hours spent conducting enforcement at high injury network sites. The City's high injury network includes streets and intersections where crashes and traffic-related serious or fatal injuries have occurred more frequently over the last several years and is publicly available on the [Safe Streets Map](#). The City uses this information to prioritize improvements, identify high risk areas, and create solutions to make our streets safe for all Edmontonians.

Table 8 illustrates the City of Edmonton's performance on the three measures defined above against the targets for each measure.

**Table 8. Automated Enforcement Performance Measures**

Performance Measures	Repeat Violators	High Speed Violations	Location Impact
<b>Target</b>	Less than 44%	Less than 7.4%	More than 12%
<b>Q1 2024</b>	40.2% - On Target	5.6% - On Target	11.0% - Within Target Range
<b>Q2 2024</b>	33.7% - On Target	7.1% - Within Target Range	15.1% - On Target
<b>Q3 2024</b>	36.9% - On Target	7.2% - On Target	12.7% - On Target
<b>Q4 2024</b>	37.2% - On Target	6.2% - On Target	13.1% - On Target

## Automated Enforcement Revenue

The automated enforcement program in Edmonton generated \$24.699 million in 2024. As outlined in [City Policy C579B Traffic Safety Automated Enforcement Reserve](#), automated enforcement revenue generated by the City of Edmonton program is reinvested back into safe mobility initiatives such as crosswalk upgrades, adaptable traffic calming installations and other road design improvements to help reach Vision Zero and do not go into general City revenues.

## Other Speed Management Initiatives

Projects and programs to encourage safe speeds are a significant focus for the City of Edmonton. Learn more about how the city is making streets safer city wide at [edmonton.ca/VisionZero](https://edmonton.ca/VisionZero).

Lower speeds translate into fewer crashes, injuries and fatalities on our streets and afford greater protection to our most vulnerable road users including pedestrians, cyclists, users of micromobility, seniors and children and therefore constitute a critical factor in creating a safe system for all people.

Shifting public understanding and expectations as to what constitutes safe and acceptable speeds will further contribute to a larger, more transformational shift in traffic safety culture and help us reach our goal of Vision Zero.

## Driver Feedback Signs

The City of Edmonton uses driver feedback signs (DFS) to share vehicle speed information with drivers and alert them to when they are speeding. In 2024, there were 237 DFS deployed across the City on major roadways, in neighborhoods and near playgrounds. In addition, portable DFS are available upon request. The total number of requests for portable DFS honoured in 2024 was 302.

The City of Edmonton's Research Chair in Urban Traffic Safety at the University of Alberta, conducted research on the effectiveness of DFS use on different roads and intervention types. Results showed significant crash reductions in all scenarios ranging from 31.0% to 41.6%. DFS were more effective in reducing crashes along arterial roadways as compared to collectors. Also, the combined use of DFS and mobile photo enforcement had a slightly higher impact on safety.<sup>5</sup>

## Speed Limit Reduction

Speed limit reduction is a *Key Action* outlined in the *Safe Mobility Strategy*, reflecting the fact that speed is a factor in every crash. In alignment with the internationally recognized evidence on the relationship between speed and traffic fatalities and serious injuries, in 2021, Edmonton implemented a reduction in the default speed limit from 50 km/h to 40 km/h, with a focus on residential streets, the downtown core and high pedestrian areas.

A comprehensive evaluation of the speed limit reduction initiative was conducted and found statistically significant reductions in speeds and crashes including serious crashes. In collaboration with the University of Alberta, a research study detailing the outcomes of the evaluation, entitled

<sup>5</sup> Wu, M., El-Basyouny, K. & Kwon, T. (2020). *Lessons learned from the large-scale application of Driver Feedback Signs in an urban city*, *Journal of Transportation Safety & Security*, 13(12):1-19. <https://www.tandfonline.com/doi/full/10.1080/19439962.2020.1726546>

*“Assessing the effectiveness of speed limit reduction in Edmonton: A case study analysis”*, was recently published in the prestigious academic journal, *Accident Analysis and Prevention*.<sup>6</sup>

Notably, the City of Edmonton was the proud recipient of the *Transportation Association of Canada’s 2024 Road Safety Achievement Award for the speed limit reduction initiative*.

Learn more about the speed limit reduction initiative at [edmonton.ca/SafeSpeeds](https://edmonton.ca/SafeSpeeds).

## Engineering

The City of Edmonton proactively builds new streets and upgrades existing streets with design features that are intended to prevent crashes or reduce the severity of outcomes when crashes occur. This includes designing and implementing measures to reduce speeds such as speed humps, speed tables, raised crosswalks, two-stage crossings and curb extensions where appropriate for the type of road.

In 2023, the City of Edmonton introduced the Towards 40 Program which is focused on improving safety in areas where speeding and road safety issues have been identified. The program is designed to increase speed limit compliance and encourage safe driving behaviours using adaptable measures to improve safety. Several [projects](#) are now underway across the City.

The Speed Humps and Tables Program was also launched in 2023. This program installs speed humps or speed tables along priority corridors where there is a need to encourage safer speeds. By 2026, 50 projects will be completed.

The City of Edmonton continuously works to improve safety around schools, along priority corridors and at priority crossings. The Safe Routes to School Program, also initiated in 2023, serves to further improve safety along the routes to schools beyond the immediately surrounding roads. In 2024, six schools were assessed and upgraded as part of this program. This will improve students’ and their families’ safety as they walk, bike and roll to school, and increase safety around playgrounds and park spaces frequented by local residents.

Learn more at [edmonton.ca/SafetyByDesign](https://edmonton.ca/SafetyByDesign).

## Education and Community Activation

The City has initiatives in place to give everyone the opportunity to get involved and help make their streets safer.

Vision Zero Street Labs is a program designed to address traffic safety concerns at the neighbourhood level. This program uses adaptable traffic calming measures on residential and collector roads to address traffic safety concerns. Deploying these adaptable measures allows the City to trial traffic safety solutions in a timely and effective manner with the ability to make adjustments as needed. Each Street Lab is tailored to the unique needs of the community in order to creatively address problems such as speeding, shortcutting and other unsafe driving behaviours.

Adaptable measures include:

- Curb extensions
- Two-stage crossings
- Centre medians

Operation 24 Hours is a high-visibility, enforcement campaign coordinated with the Edmonton Police Service, to reduce speed and other traffic violations. In 2024, Operation 24 Hours events were held in April, May, September and October.

To support the Speed Limit Reduction initiative, the Safe Mobility team developed a suite of tools to address potential misperceptions and alleviate concerns, such as those related to the expectation of longer travel times, the costs of the project, and signage pollution, and to place emphasis on the positive outcomes that lower speed limits have on safety and livability.

This suite of tools includes a [web page](#) with up-to-date information, a [Frequently Asked Questions](#) (FAQs) section, and the [Estimated Time of Arrival \(ETA\) tool](#), developed in partnership with the University of Alberta. This tool encourages people to test the impact of the speed limit change on their personal travel times. A series of [Awareness Videos](#) and an interactive [Speed Limit Map](#) to help people understand which roads were included in the speed limit reduction, along with advertising through dynamic message signs (DMS), and a postcard sent to every household in Edmonton, rounded out the suite of tools.

## Conclusion

The City will continue to support safe speeds on Edmonton’s streets through the *Safe Mobility Strategy* and automated enforcement, which continues to serve as an essential tool in combination with educational and engineering programs. The City of Edmonton is proud of the achievements made towards safer and more livable streets.

The City is committed to ensuring that its automated enforcement program is in compliance with the Government of Alberta’s Automated Traffic Enforcement guidelines, available via their [Photo Radar](#) web page.

## Appendices

**Appendix 1.** Mobile Photo Enforcement Data for each site active between 2021 and 2024, including:

- Deployment hours
- Violations
- High speed violations
- Tickets
- High speed tickets
- Traffic monitored
- Average speed
- Total crashes
- Fatal crashes
- Major injury crashes
- Injury crashes
- Property damage crashes
- Traffic injuries and fatalities

**Appendix 2.** Intersection Safety Device data for each site active between 2021 and 2024, including:

- Number of days active,
- Speeding violations
- High speed violation
- Speeding tickets
- High speed tickets
- Red Light violations
- Red Light tickets
- Traffic monitored
- Average speed
- Crash data for full intersection and monitored direction
  - Total crashes
  - Fatal crashes
  - Major injury crashes
  - Injury crashes
  - Property damage crashes
  - Traffic injuries and fatalities
