

June 2025

Construction is starting on new active transportation routes

Construction is starting along 127 Avenue from 97 Street to 102A Street to install a shared pathway* and a pedestrian crossing with a traffic signal at 102A street. Once complete, these new routes will be connected to the city's network of shared pathways, bike lanes, local street bikeways and existing shared roadway routes. Edmonton's active transportation network provides safe and direct options for commuting, running errands, accessing parks and enjoying the river valley for those who walk, cycle and roll.

Project overview

In December 2022, City Council approved funding to expand Edmonton's active transportation network, focusing on completing missing links in the existing network. As part of the Active Transportation Network Expansion Program, the City of Edmonton is developing a connection from the existing shared pathway along 102A Street to the existing shared pathway along 97 Street, which provides an important connection over Yellowhead Trail.

This plan was developed based on technical and safety requirements, City policies, The City Plan, targeted engagement with directly impacted property owners where needed and previous public engagement data collected during development of the Bike Plan (more information on the Bike Plan can be found here: edmonton.ca/BikePlan).

Construction impacts

The new routes are anticipated to be open for use by the end of 2025 (construction activities will be completed in 2025/2026). While the project team is working to reduce construction impacts, temporary access adjustments may be required. **Please respect all signage and obey staff direction in this active work area.**

While construction is underway, nearby residents and businesses may experience increased noise levels and traffic due to the nature of the work. Construction activities will take place between the hours of 7 a.m. and 7 p.m., with most of the work being completed outside of peak traffic hours. This aligns with the City's Community Standards Bylaw 14600. Steps will be taken to reduce dust and minimize noise for residents and businesses.

If you have special access requirements, such as DATS, please send an email to ActiveTransportation@edmonton.ca as soon as possible.

***Shared pathway:** A paved path that is shared by all active transportation users, including those who bike, walk, run, scoot, blade and more. Bikes are allowed to ride on shared pathways. Shared pathways are typically 2.5 metres or wider and are marked with signs that indicate they are to be shared by multiple types of users.
