

June 2025

## Construction is starting on new active transportation routes

Construction is starting along Wagner Road to install a shared pathway\*. Once complete, this new route will be connected to the city's network of shared pathways, bike lanes, local street bikeways and existing shared roadway routes. Edmonton's active transportation network provides safe and direct options for commuting, running errands, accessing parks and enjoying the river valley for those who walk, cycle and roll.

### Project overview

In December 2022, City Council approved funding to expand Edmonton's active transportation network, focusing on completing missing links in the existing network. As part of the Active Transportation Network Expansion Program, the City of Edmonton is developing a connection along Wagner Road from 75 Street to 86 Street. This route provides an east-west connection to the 75 Street shared pathway and the 86 Street shared pathway. The new Wagner Road shared pathway also offers a more complete active modes connection to the Davies LRT station and W.P. Wagner High School.

This plan was developed based on technical and safety requirements, City policies, The City Plan, targeted engagement with directly impacted property owners where needed and previous public engagement data collected during development of the Bike Plan (learn more about the Bike Plan at [edmonton.ca/BikePlan](https://edmonton.ca/BikePlan)).

### Construction impacts

The new route is anticipated to be open for use by the end of 2025 (construction activities will be completed in 2025/2026). While the project team is working to reduce construction impacts, temporary access adjustments may be required. **Please respect all signage and obey staff direction in this active work area.**

While construction is underway, nearby residents and businesses may experience increased noise levels and traffic due to the nature of the work. Construction activities will take place between the hours of 7 a.m. and 7 p.m., with most of the work being completed outside of peak traffic hours. This aligns with the City's Community Standards Bylaw 14600. Steps will be taken to reduce dust and minimize noise for residents and businesses.

If you have special access requirements, such as DATS, please send an email to [ActiveTransportation@edmonton.ca](mailto:ActiveTransportation@edmonton.ca) as soon as possible.

**\*Shared pathway:** A paved path that is shared by all active transportation users, including those who bike, walk, run, scoot, blade and more. Bikes are allowed to ride on shared pathways. Shared pathways are typically 2.5 metres or wider and are marked with signs that indicate they are to be shared by multiple types of users.
