**Notes for Rezoning Application Fees**

- The highest base fee is charged among proposed categories. Any applicable area rates are charged per proposed category - see example below.
  - If an application has proposed zones in the same category, the proposed category's base rate will be charged once.
  - Except MU and DCs, each zone within the same category or different category will be charged its associated area rate based on the site area (ha) for the boundary of the proposed zone(s).
  - Proposed Height (h) Modifiers changes under RSM, RM and RL zones shall be charged their respective category base fee and area rates.
  - If you are rezoning from a zone within the Agriculture category you will be charged for the full area of application. If you are rezoning from a zone that is not within the Agriculture category you will only be charged for the site area.
  - The increase in FAR for the MU zone will be calculated by subtracting the existing FAR from the proposed FAR. A reduction in FAR will not result in a reduction in fees.
  - Existing FAR is the maximum base FAR listed within a zone taking into account Floor Area Ratio (f) Modifiers. Embedded FAR modifiers such as for inclusive design or supportive housing will not be taken into account. Existing zones without a listed maximum FAR will have an FAR of 0.
- Direct Control Types are characterized as follows:
  - **Administrative:** A standard zone is being rezoned to a DC for a minor technical reason (i.e. minor numerical changes to regulations, removal of uses from a standard zone), minor amendments to an existing DC zone.
  - **Minor:** Changes to the character of the site that do not significantly change the intensity of the use.
    - Resembles a standard zone with minor changes to uses that change the character of the zone.
    - Addition or changes to regulation(s) from Standard Zone.
    - No increase in FAR from existing zoning.
    - Only "architectural" changes to height that do not result in additional floor area.
  - **Major:**
    - Significant changes to the character and intensity of uses. (i.e. commercial, residential and mixed use towers, adding residential uses to commercial site or non-residential uses to residential site, large-site rezonings)
      - Increase 2 or more of FAR/height/density
      - Major additions of uses from previous standard zone or DC
      - Major changes or additions of regulations from standard zone or DC
      - Application requires comprehensive site planning supported by technical studies
- Rezoning applications are subject to a notification and engagement fee component.
- The applicant must pay the difference in fees, prior to third reading of the amending Bylaw, for any application resulting in a zone in a higher fee category than that initially applied for, whether the application was amended by the applicant, Development Services, or City Council. If the resulting Zone is in a lower fee category, no refund shall be made.

## Notes

---

Safety Codes Fee is applicable to Building Permits, Gas Permits, Temporary Gas Permits, Plumbing Permits, HVAC Permits, Sewer Permits, and Electrical Permits. It is 4% of **each individual permit fee**, with a minimum of \$4.50 and a maximum of \$560 per permit.

**Construction Value** means the value of the construction of an undertaking as determined by the City Manager.

**Combined Building Mechanical Permit Fee** means a single fee payable for all of the following permits for an undertaking: a building permit, a gas permit, a heating, ventilating, and air-conditioning permit, and a plumbing permit.

**Electrical Installation Cost** means the cost of the materials and labour to install a particular electrical undertaking.

**Floor Area** is used as a denominator in determining the "cost per square foot" value. We have adopted the Canadian Institute of Quantity Surveyors' definition of Floor Area which dictates:

1. Measure each floor to the outer face of the external walls;
2. No deductions for openings at stairs, elevators or vertical ducts are made;
3. A deduction is made for a non-service vertical protrusion, e.g., atrium space;
4. Mezzanine floors are generally included;
5. Balconies are excluded; enclosed solariums in residential condominiums are included;
6. Sloping and stepped floors (auditoriums/movie theatres) are measured flat; and,
7. Exclude all external covered walkways

If a permit is extended or reactivated, the fee payable for the permit is one-half of the amount required for a new permit for the project, provided no changes have been made or proposed to what was originally approved.

<sup>1</sup> Includes multi-unit Backyard Housing.

<sup>2</sup> House Wiring Permit Fees are based on the Floor Area of the House.

<sup>3</sup> The Electrical Additional Meter Set fee applies to additional meters required for separate entryway addresses but not for individual apartment/condo units that share one entryway. The first meter is included in the Electrical Permit fee.

<sup>4</sup> If a re-examination of revised plans involves an increase in:

- construction value of more than \$25,000, or
- total floor area of the project,

then permit fees will be adjusted according to the prevailing fee schedule.

<sup>5</sup> City of Edmonton - EPCOR Water Services Bylaw 19626.

<sup>7</sup> Business hours are 8:00 AM - 4:30 PM on weekdays. Inspections requested outside of that time (evenings, weekends, and statutory holidays) are subject to the charges listed.

<sup>8</sup> Festivals and Special Events are charged standard commercial and trade minimum fees which include permit review, permit issue and up to an hour on-site inspection. Each additional half hour or part thereof when inspection occurs are charged at the rate listed.
