

Construction Notice – Tree removals in Blackmud Creek

Beginning on/around **April 3**, Ledcor, the Design-Build contractor for the project, will need to remove a mixture of trees, shrubs and vegetation in the Blackmud Creek Ravine, west of 111 Street. This work is anticipated to take approximately two weeks and is necessary to prepare for the construction of the LRT bridge that will span the ravine. Please refer to the map below for details.

Other Impacts

- Work will occur on weekdays and Saturdays between 7:00 a.m. and 5:00 p.m.
- Pedestrians using the path adjacent to the work zone may be temporarily stopped to accommodate equipment and workers.
- No traffic disruptions are expected during the work.
- Efforts will be made to minimize noise, vibration and dust. Mitigation measures will be implemented to monitor and reduce these impacts.

In accordance with the municipal [Public Tree Bylaw](#), all tree removals will be conducted under the supervision of certified arborists. Ledcor acknowledges Edmontonians are passionate about trees and have a desire to maintain the city's extensive urban canopy. The decision to remove a tree is never taken lightly. Once project construction is complete, new

vegetation including trees, native grassland, shrubs and flowers will be planted along portions of the alignment.
