

Construction Notice – Median removals and lane closures along 111 Street

Beginning **on/around April 14**, Ledcor, the Design-Build contractor for the project, will remove the median on 111 Street between Anthony Henday Drive and Blackmud Creek bridge (Phase 1). This work is expected to last approximately three weeks. Once that section is complete, beginning on/around **May 5**, Ledcor will remove the median between the Blackmud Creek bridge and Saddleback Road/19 Avenue (Phase 2). This work is anticipated to take approximately two weeks.

For the 5-week duration of this work, traffic will be **reduced to one lane in each direction** on 111 Street within the construction areas. Single left and right turn lanes will be maintained at all intersections. Speed limits will be reduced to 40 km/hr. Please refer to the maps below for details about the **upcoming lane closures**.

The purpose of removing the medians on 111 Street is to allow two lanes to be open in each direction during major LRT construction.

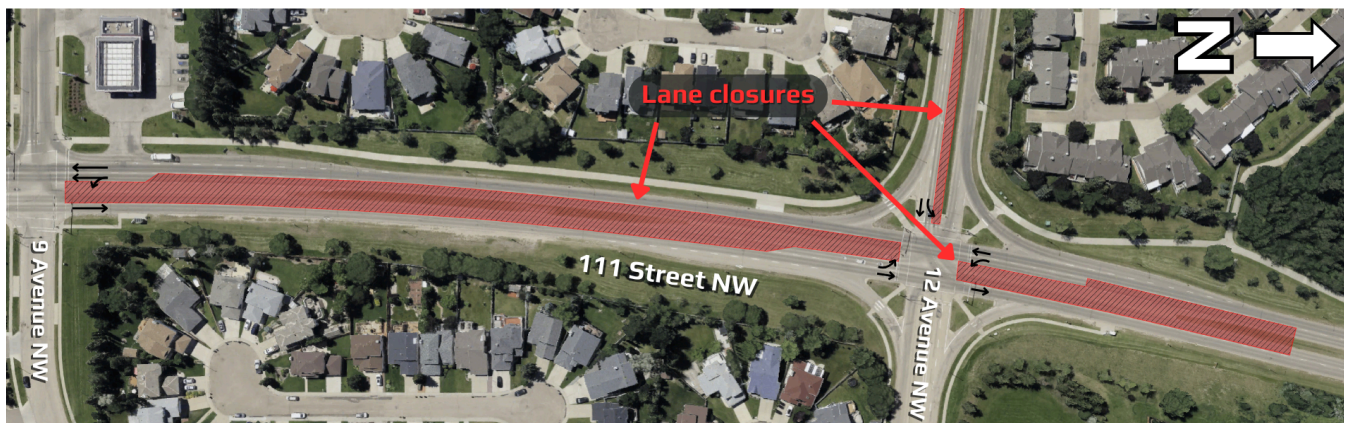

Map 1: Overview of work areas on 111 Street (Phase 1 and 2)

Map 2: Close-up of Phase 1 lane closures on 111 Street between Anthony Henday Drive and 9 Avenue

Map 3: Close-up of Phase 1 lane closures on 111 Street between 9 Avenue and Blackmud Creek Bridge

Map 4: Close-up of Phase 2 lane closures on 111 Street between Blackmud Creek Bridge and Saddleback Road/19 Avenue

What to Expect

Traffic impacts

- For the 5-week duration of this work, traffic will be **reduced to one lane in each direction** on 111 Street within the construction areas.
- Single left and right turn lanes will be maintained at all intersections.
- For safety, the speed limit in the work zone on 111 Street will be reduced to 40 km/h in each direction.
- Pedestrian access will be partially blocked across 111 Street at 12 Avenue during Phase 1 and 2, and at Saddleback Road/19 Avenue during Phase 2. One crossing at each intersection will remain open at all times.

Other Impacts

- Work will occur on weekdays and occasionally on weekends between 7:00 a.m. and 5:00 p.m.
- Efforts will be made to minimize noise, vibration and dust. Mitigation measures will be implemented to monitor and reduce these impacts.
