

Beacon Heights Neighbourhood Renewal Launch

Beginning in October, you will see some activity in Beacon Heights as we prepare for Neighbourhood Renewal in your area.

Through the Neighbourhood Renewal program, roads, sidewalks, street lights and park spaces in mature neighbourhoods are renewed and rebuilt. Opportunities to improve other areas including bike connections and green spaces and measures to slow traffic will be explored. As part of Beacon Heights Neighbourhood Renewal, some of the business alleys between 118 Avenue and 119 Avenue will be renewed. The scope of the Alley Renewal work is still being decided and will be shared when complete.

Planning for renewal in Beacon Heights, including engagement with residents and partners, is about to get underway.

In preparation for the planning and design phase of the renewal, activities are beginning, including:

- **LiDAR 3D imaging** - You may have already seen a Reflektar truck in the neighbourhood picking up information about road widths, curb locations, park features, boulevard tree locations and sidewalk details. You may also notice markings on the roads at intersections - some look like a large V - these are used to support the imaging. There will also be survey crews installing metal pins and completing a manual survey.
- **Utility location** - Paint markings will start appearing in alleys and flags of different colors will be placed showing the location of underground utilities. Narrow holes will be dug in alleys to locate underground utilities, and then these holes will be filled. During this time, you will see the following vehicles: Inertia Hydrovac trucks, Telecom locator vehicles, survey crew vehicles, and other utility vehicles.

Working together to make the most of your neighbourhood

Our team will be working with residents, property owners and partners in Beacon Heights over the next two years to understand your needs and desires for this renewal as part of the input process to shape the future neighbourhood. These conversations will begin this Winter. Please visit our website at edmonton.ca/BuildingBeaconHeights for more information and to sign up for project updates.

We know some great work has already been conducted that we would like to use as a starting point, where relevant, for our project and discussion. We will be reaching out to interested and impacted

organizations in the coming weeks to share more details on our project and discuss how we might learn from the work conducted previously and how we might cooperate/collaborate moving forward to the benefit of all.

This is your city and your neighbourhood. We want to understand how you experience your neighbourhood and ask for your input on what we might do to make it better. We will engage and work with you on the renewal of roads, sidewalks, street lights and park spaces, and promote other community opportunities to enhance how people live and interact in Beacon Heights. We commit to being open and transparent about how your input is used.

Let's make the most out of your neighbourhood.
