

Construction Notice – Tree removals along 111 Street

Beginning **the week of November 25**, Ledcor, the Design-Build contractor for the project, will need to remove approximately 100 trees on top of the berm on the west side of 111 Street, between 23 Avenue and Saddleback Road. Please refer to the map below.

- This work is anticipated to take approximately one week.
- Work will occur on weekdays and possibly Saturday between 7:00 a.m. and 5:00 p.m.
- No traffic disruptions are expected during the work.
- Efforts will be made to minimize noise, vibration and dust. Mitigation measures will be implemented to monitor and reduce these impacts.

In mid-December, the berm on the west side of 111 Street will be removed as well. Further details about this work will be shared in the coming weeks. This work is necessary to prepare the site for the excavation of an entrance for the LRT underpass, which will allow trains to travel beneath the 23 Avenue and 111 Street intersection.

In accordance with the municipal [Public Tree Bylaw](#), all tree removals will be conducted under the supervision of certified arborists. Ledcor acknowledges Edmontonians' profound desire to maintain the city's extensive urban canopy. The decision to remove a tree is never taken lightly. Once project construction is complete, new vegetation including trees, native grassland, shrubs and flowers will be planted along portions of the alignment.
