

## Construction Notice – Piling in Blackmud Creek Ravine for future LRT Bridge

Starting the **week of October 6**, Leducor will begin installing concrete piles in Blackmud Creek Ravine, west of the Blackmud Creek traffic bridge on 111 Street. These piles will eventually support the future LRT bridge. **Significant noise, vibration and dust will be associated with the piling.**

This work is expected to last approximately **two months** and will occur on weekdays between 7:00 a.m. and 7:00 p.m. Work may also occur on weekends between the same hours when required. We thank nearby residents for their patience as we complete this important work for the future LRT bridge. Please refer to the map below for details.

**Map: Blackmud Creek Construction Area**

#### Other Impacts

- Piles will be installed using a combination of driven and drilled methods, which will result in varying levels of noise.
- Heavy truck traffic will increase on 111 Street. No other traffic disruptions are

expected during the work.

- Large equipment used for piling will include piling rigs, cranes and numerous trucks.
- Mitigation measures are in place to minimize disruptions as much as possible, and work will be monitored from safety, technical and environmental perspectives.
- Blackmud Creek is located within the North Saskatchewan River Valley Area Redevelopment Plan (ARP), Bylaw 7188. Construction activity will be in accordance with the approved Environmental Impact Assessment (EIA) and Site Location Study (SLS) for the project.
