

Maximum allowable roof midpoint is 4.3 metres (14 feet).

See the [Zoning Bylaw](#) to find midpoint calculation information for other roof types.

Metres or feet/inches are accepted. Please use units consistently.

Roof Midpoint Calculations:	
Grade to peak	4.0 m
Grade to eave	3.0 m
Midpoint: Average between grade-to-peak and grade-to-eave	$(4.0\text{ m} + 3.0\text{ m}) / 2 = 3.5\text{ m}$
