

## Do you have traffic safety concerns in your neighbourhood? We want to hear from you!

A Vision Zero Street Lab is being considered for High Park! The City would like to hear about your lived experience to help determine if a Vision Zero Street Lab would improve road safety and livability in your neighbourhood.

### What is a Vision Zero Street Lab?

Vision Zero Street Labs are a great way to work with the City to bring traffic safety improvements to your neighbourhood using adaptable traffic calming measures on residential roads. Each Street Lab is tailored to the unique needs of the neighbourhood to creatively address community problems such as speeding, shortcutting and other unsafe driving behaviours.

## Engagement Opportunities

To register for the engagement opportunities **November 12 - December 3, 2024**, [scan this QR code](#) with your smartphone camera or visit [edmonton.ca/StreetLabs](https://edmonton.ca/StreetLabs)

### **In-Person Engagement: Tuesday, November 19 from 5:30 p.m. to 7:30 p.m. at High Park Community League Hall, 11032 154 Street**

Drop-in to meet with City staff to learn about Street Labs, ask questions and discuss accessibility, mobility and street safety.

### **Online Interactive Map: Open November 12 to December 3, 2024**

Pinpoint traffic safety concerns on the interactive online map and answer a series of related survey questions to share more information.

Questions or comments? Email us at [saferoads@edmonton.ca](mailto:saferoads@edmonton.ca).  
Sign up for project updates at [edmonton.ca/StreetLabs](https://edmonton.ca/StreetLabs).

# Street Lab Scope Map

Vision Zero Street Labs use adaptable measures to address traffic safety concerns on residential roads with local and collector traffic volumes. **Out-of-scope roads** for the High Park Street Lab are: 107 Avenue, 111 Avenue, 149 Street and 156 Street, as these are all high-volume arterial roads.
