## Mill Creek Trestle Bridge and Culvert Replacement

---

The City of Edmonton is replacing the Mill Creek Trestle Bridge and culvert on 76 Avenue between 95 Street and 89 Street. Tree removals will begin mid-October 2025. Following the tree removal, construction is anticipated to start at the end of October or early November.

### Tree Removals

To help achieve the proposed scope of work, an area of trees within the construction area is necessary. *(Please see a map on the other side of this notice).* The City will cover the cost associated with these tree removals. Before any tree removals, a City of Edmonton Urban Forester will assess the tree impacts within the identified area. Every effort will be made to minimize impacts on trees while still achieving the project's objectives. A search for the presence of wildlife will be completed by a qualified professional prior to tree removals beginning. The area will be landscaped and renaturalized after construction is completed.

**The tree removals are scheduled to begin on October 14 and are expected to take about two weeks.**

As part of this removal process, the City will implement a wood reclamation program to divert timber products from landfills. Reclaimed wood may be used to manufacture various products, including picnic tables for play spaces, benches, park signage and shelving. This initiative diverts logs from landfills, thereby reducing disposal costs and carbon emissions.

### Access

During the tree removal process, the westbound lane will be closed for about three days. Pedestrians will detour from the sidewalk to the trestle bridge path. The eastbound lane will be closed for approximately 10 days for removals on the south side of 76 Avenue. The eastbound closure will not impact pedestrians. Flaggers will be on site to direct traffic during this construction.

### Pre-construction event:

To share information about the project, including tree removals, the construction schedule, the road closure and detour options for the trail system and the road, the City of Edmonton is hosting a pre-construction event.

Please join the project team for an in-person event:

**Date:** Saturday, September 27

**Time:** 11 a.m. to 3 p.m. (drop in)

**Location:** Ritchie Community League Hall (7727 - 98 Street)

## Construction timeline:

The construction timeline is being confirmed, but it is scheduled to begin in the fall of 2025. Information, including dates and scope of work, will be available on the project web page ([edmonton.ca/MillCreekTrestleBridge](http://edmonton.ca/MillCreekTrestleBridge)) in mid-October.
