

July 2025

## Missing Sidewalk Program

---

The City of Edmonton is starting sidewalk construction on 153 Avenue from 117 Street to 121 Street. The Missing Sidewalk Program focuses on filling in missing links in the pedestrian network, including lighting, signage and bike parking. In preparation for construction, some trees and shrubbery near the area must be removed. **This removal is scheduled to begin in July 2025 and is expected to be completed by the end of August 2025.**

### Construction Details

- Addition of 725 metres of new sidewalk that connects to existing paths.
- Traffic flow on 153 Avenue will be maintained, though single-lane closures may occur during the hours of 9 a.m. to 3 p.m.
- Tree removal and tree replacement along 119 Street on 153 Avenue.

### Tree Removal

- Tree removals are required as part of this project. Removals are anticipated to begin in mid-July (weather permitting). Five trees will be removed along 119 Street on 153 Avenue.
- By working closely throughout the project, The City of Edmonton has minimized the number of trees removed and ensured that construction activities do not compromise the integrity of the retained trees and vegetation within the project boundary.
- City-owned trees are a highly valued asset and are only removed when all other preservation options are unsuitable. As part of the Urban Forest Management Plan, the City will plant new trees and shrubs in the project area once construction is complete.
