

Upgrades coming to Northmount traffic calming measures!

Improving Traffic Safety

Adaptable traffic calming measures were installed in **Northmount** in July 2024 to address traffic safety concerns such as speeding, shortcutting and other unsafe driving behaviours.

Adaptable traffic calming measures help the City to quickly improve road safety and adjust as needed. When these measures prove effective and budget allows, they are replaced with permanent asphalt or concrete solutions for long-term durability.

Opportunities to convert the installed adaptable traffic calming measures to permanent are reviewed and prioritized periodically at select locations. We're happy to share that two of the measures from the Northmount Street Lab have been selected and will be converted to asphalt permanent measures. All other traffic calming measures in the neighbourhood will remain in place.

Planned Upgrades

Traffic calming measures outlined in the table below will be converted to permanent measures by **mid July 2025**, weather and resources permitting.

Measure and Location	Benefit	Example Image
<p>What We're Upgrading Speed humps:</p> <ul style="list-style-type: none"> Two speed humps along 96 Street between 143 and 140 Avenue 	<p>Speed humps can help:</p> <ul style="list-style-type: none"> ✓ Slow vehicle speeds. ✓ Discourage shortcutting through the neighbourhood. ✓ Reduce the risk of serious crashes. ✓ Increase safety for people walking, biking and rolling.
