Public Engagement Spectrum

The public engagement spectrum is a tool that explains the level of influence the public has when they participate in City of Edmonton public engagement activities. The level of influence for this phase of the project is **ADVISE**.

How Decisions are Made

As part of the decision-making process decisions are made based on three components:

- + **Technical requirements** – what infrastructure best meets the area's needs, where it can fit and what impacts it will have to the immediate and surrounding area
- + **City policies and programs** – how City initiatives and activities are implemented
- + **Public input** – local knowledge of the community

Project Vision and Design Principles

Vision

A vibrant, safe and accessible recreation and community hub for South Central Edmonton Neighbourhoods

Design Principles

The Park accommodates unique city-wide facilities and events while maintaining its district focus.

The Park enhances the year-round active and passive outdoor recreational opportunities geared towards both organized and casual use;

The Park has a distinct identity that celebrates community and acts as a hub to bring people together.

The Park is designed holistically and in the context of surrounding amenities.

The Park design encourages transportation choices that minimize impact to surrounding homes;
Travel routes within the Park prioritize pedestrians

The Park is environmentally sustainable and maximizes natural elements.
