

BUILDING A PROJECT VISION TOGETHER

We invite you to collaborate with us to develop the vision for the neighbourhood renewal project.

Outcome

Together, we co-create a vision for the project, which is meaningful to your community.

Our Commitment

We commit to using your community's input in co-creating a vision for your neighbourhood renewal project.

CREATE

BUILDING GREAT
NEIGHBOURHOODS
AND OPEN SPACES

Edmonton

Your neighbourhood is scheduled to be reconstructed roughly every 50 – 60 years. The City of Edmonton will collaborate with local residents to understand what is working well in your neighbourhood, what could be improved and ideas for the future.

Building Great Neighbourhoods invites you and your neighbours to participate in a collaborative neighbourhood renewal process.

This process helps:

- + Understand how you experience your neighbourhood
- + Hear from you on what might make the neighbourhood better
- + Develop a neighbourhood renewal plan unique to your neighbourhood

Getting to know each other

We will share what neighbourhood renewal is all about, how the City makes project decisions and how you can get involved.

We will start to understand:

- + How you live and move in your neighbourhood
- + What characteristics best describe your neighbourhood
- + What you love about your neighbourhood
- + What current issues are requiring change
- + What you envision for the future of the neighbourhood

Creating a vision

How do we create a vision that reflects the values and priorities of a community and shapes the design and construction of a great neighbourhood?

We need your help to co-create the neighbourhood renewal project vision. The vision, along with understanding the important elements for the renewal, will help inform a design for your neighbourhood.

A vision is a short description that sets the direction on where the community would like to see livability and mobility in the future. Important elements are identified for the City's work on roads, sidewalks, curbs, street lights and outdoor public spaces. These elements tell us the most important things to look at when we create plans to renew your neighbourhood.

Creating guiding principles

Guiding Principles are ideas which inform how the vision is applied to the neighbourhood design. These principles are unique to your neighbourhood and can:

- + Include important elements to be considered in your neighbourhood design
- + Describe livability and transportation values and priorities for the community
- + Identify how we will know the project was successful

Thinking about the way you live, work, play, and move around your neighbourhood:

- + How do you see or experience your neighbourhood today?
- + What's important about your neighbourhood that should stay the same?
- + What's important to change for tomorrow?
- + What are the most important challenges to be addressed?

Notes:

In the next stage of the renewal process, **Exploring Opportunities**, we ask you to:

- + How you live and move
- + What characteristics best describe it
- + What you love
