BRINGING OUR CITY VISION TO LIFE

Welcome

Northwest Light Rail Transit (LRT) Concept Planning Study

NORTHWEST LRT CONCEPT PLANNING STUDY

July 7, 2010 - City Council Approved Corridor (Transportation System Bylaw 15101)

NORTHWEST LRT CONCEPT PLANNING STUDY

Where We Are Now: 2012-2013 Concept Planning Study

- The previous phase identified the route the LRT should follow
- This Concept Planning Study is to develop a concept plan that:
 - Defines specific location of tracks & stations within the approved route
 - Defines the layout of stations
 - Defines property requirements (if any)
 - Defines auto access requirements for adjacent properties
 - Considers ease of access & interchange for cyclists, pedestrians & bus users
 - Provides necessary information to begin preliminary engineering
- A recommended concept is anticipated for City Council review by spring 2013

NORTHWEST LRT CONCEPT PLANNING STUDY

What has changed?

- A revised concept plan for the 153 Avenue corridor that creates greater flexibility for the City to develop and deliver the system design and operation.
- The benefits of this new design is that LRT could operate at a higher speed on this portion of the corridor; should it operate at higher speed it would require gates and bells.

NORTHWEST LRT CONCEPT PLANNING STUDY

What Happens Next

- Comments received tonight will be included in a report to City Council's Transportation Committee (TC)
- The Recommended Concept Plan displayed tonight and the report will be presented at a public hearing at TC in spring 2013 at City Hall
- Register to speak: www.edmonton.ca/meetings or call the City Clerk's Office at 780-496-8178
