ETS programs Administrator

Edmonton Transit- Business Development

I wanted to write a quick letter to let you know how the ETS@work program has been working for our hotel. Our employees were much excited with this initiative. Our employees love the program because of the convenience. It is also easy to administer. The employees enjoy the discounts and it works along with our retention strategies. They also appreciate the tax benefits.

As one of our many Environmental initiatives in the hotel, it gives our employees a sense of pride knowing that they are participating in a program that contributes to reducing the impact on the environment.

I would recommend this program to any employer who is looking to offer more low costs benefits to the employees to improve quality of life.

Thank you,
