Please find hereunder my humble contribution in support of the ETS@Work Program.

"Safety, dependability and savings are the three most common answers when our employees are asked about the benefits they get from our city's transport system. I believe it is important for them knowing that ETS' operators will bring them safely to work and back home every single day, that the buses come on time and that they enjoy additional discount our company is able to give them with the ETS@Work Program. At Tim Hortons, we believe in making a difference -- for both our customers and our employees. Enrolling our staff with the ETS@Work Program is just one of our efforts towards that goal."

- Mark Havin
Contiki Rose Inc. o/a Tim Hortons

Sincerely yours,

Mark Havin
