

Petrolia Public Realm Enhancements

As part of the City's Economic Development Plan, we are working to create a vibrant, livable city including making enhancements to the public realm around neighbourhood commercial centres. The public area next to Petrolia Mall was previously selected for these enhancements. We would like your feedback on draft concepts. Please share your thoughts.

Project Overview

Petrolia Public Realm Enhancements include improvements to the public space around the commercial area of Petrolia Mall.

To ensure potential enhancements around Petrolia Mall reflect the surrounding communities' priorities and aspirations, the City asked for input from residents through an open house and survey in 2017. Over 430 responses were received and used to inform the development of draft concepts for consideration.

What We Heard

Emerging themes included:

- Desire for improved landscaping (trees, shrubs, flower beds).
- Interest in improved lighting.
- Concern regarding the 4-way intersection at 40 Avenue and 114 Street.
- Desire for improved pedestrian crossing.
- Interest in seeing additional seating and garbage bins.
- Concern regarding potholes and the state of sidewalks.
- Concern regarding vehicle access to the mall property.
- Potential improvements to the intersection including pedestrian crossing are also being explored (refer to Focus Area 9).

Draft Concepts

The City used the input gathered in public engagement to develop the three draft concepts provided below.

The draft concepts include landscaping, trees, seating plazas, trash receptacles and decorative streetlights to enhance the space, make it more pedestrian-friendly and beautify the Petrolia Mall area.

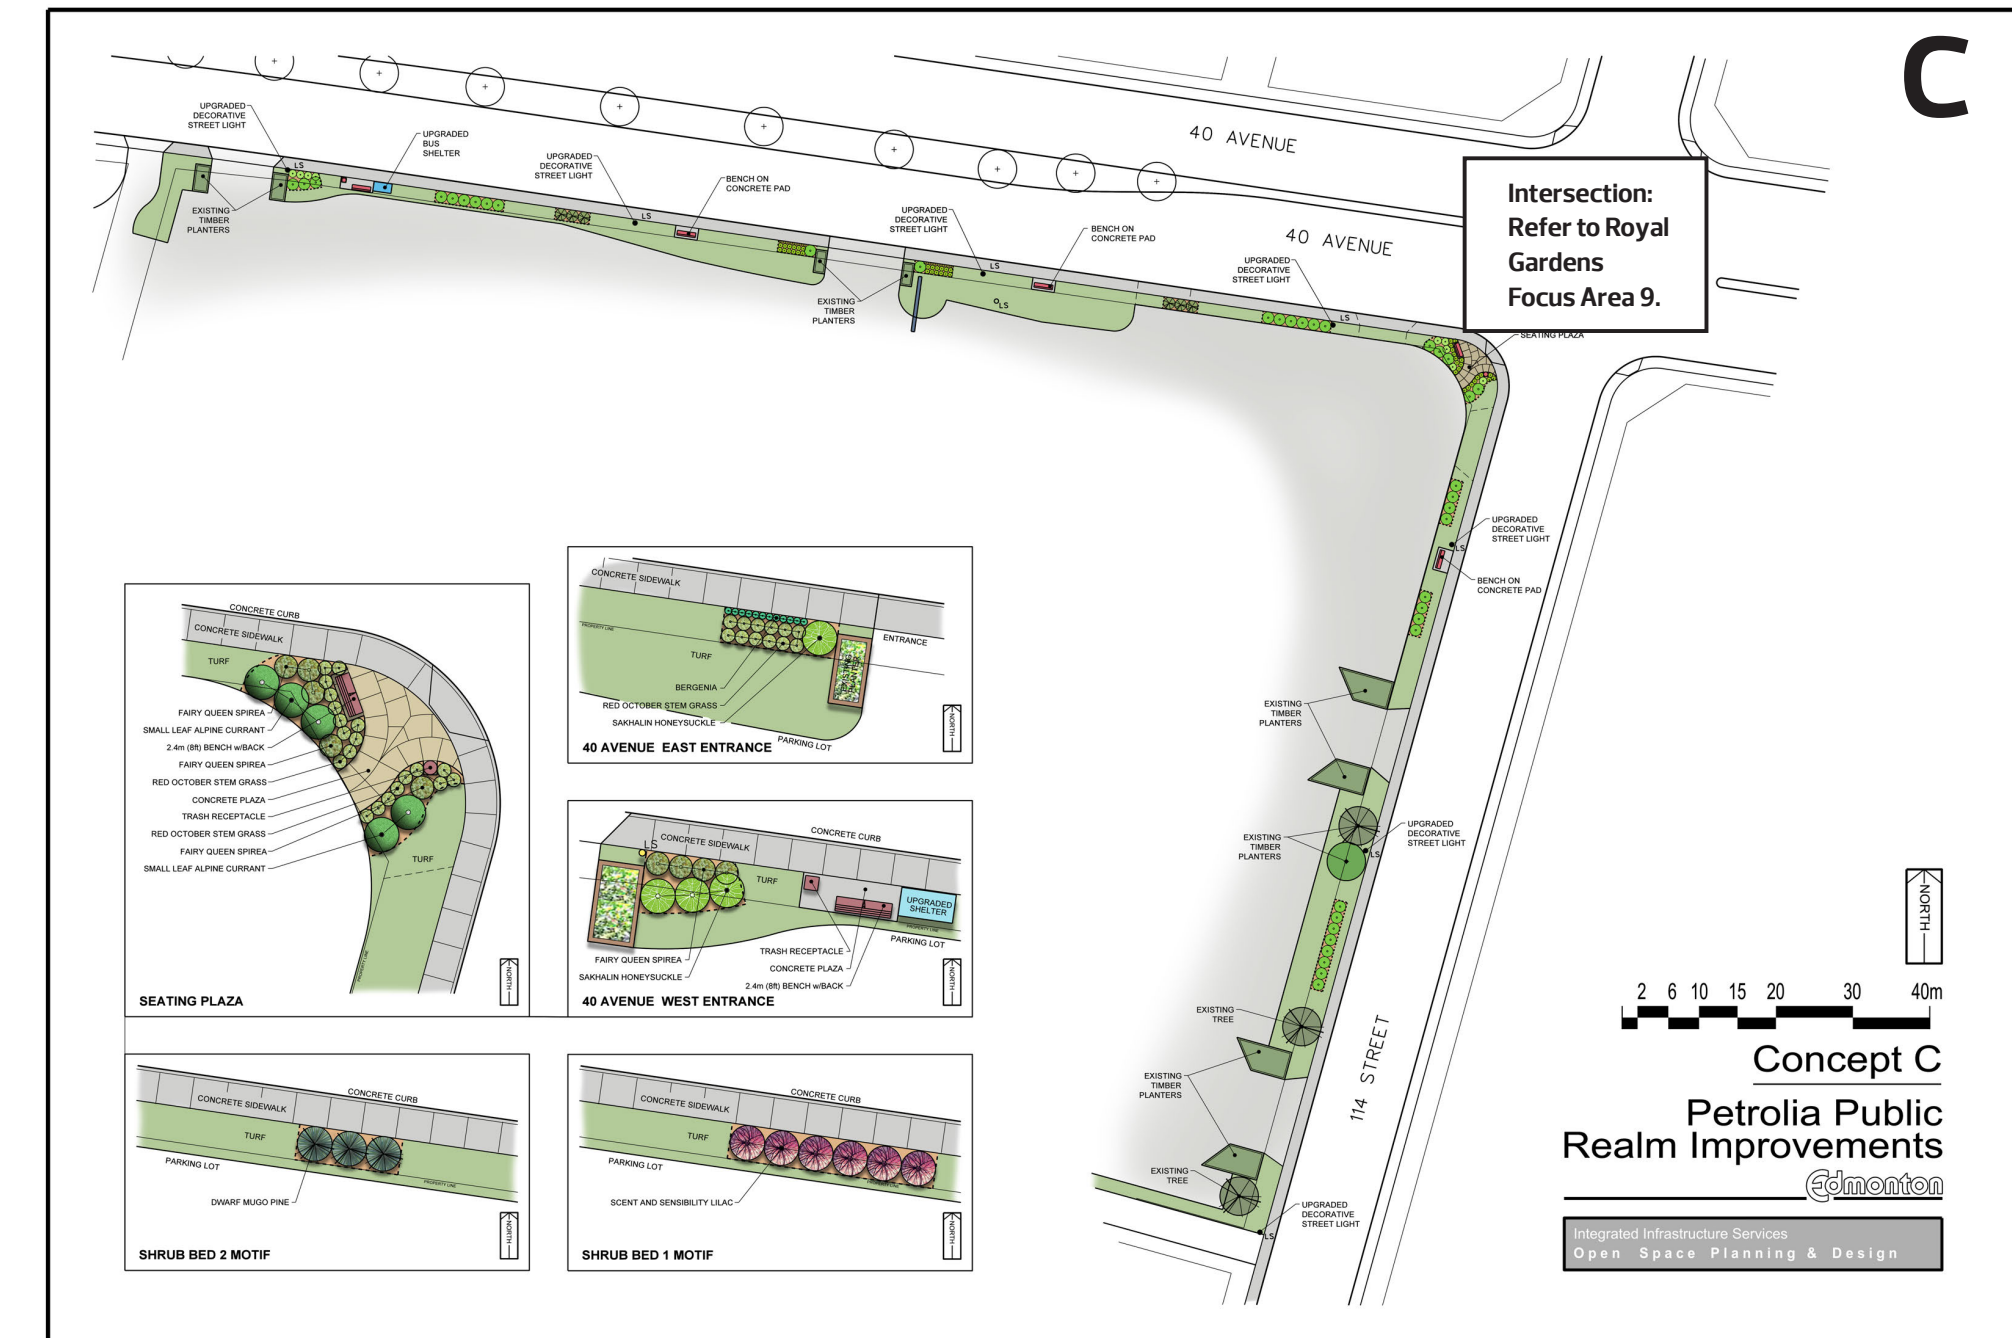

Moving Forward

Feedback gathered will be used to help refine and adapt the concepts to develop a finalized plan. The enhancements are funded and will be delivered in coordination with Royal Gardens Neighbourhood Renewal.

Additional opportunities to provide feedback on this are being planned for the summer months.
