City of Edmonton
Integrated Infrastructure Services

The logo for the City of Edmonton, featuring the word "Edmonton" in white text on a blue square background.

Site preparation is starting at the Coliseum

In the coming weeks, site preparation will begin at the Coliseum site (formerly known as Northlands Coliseum), located at 7424 118 Avenue NW. This work is being undertaken to prepare for the Coliseum Deconstruction and Site Redevelopment.

Site preparation will involve site investigations, surveying and mapping, utility locating, trailer mobilization and setup, soil testing and some hazardous materials abatement and selective deconstruction in small, isolated areas.

Impacts of the work

While the upcoming work is anticipated to have minimal impact on nearby residents and businesses, there may be increased noise levels and traffic. The majority of activities will take place between the hours of 7 a.m. and 9 p.m., Monday through Saturday, in accordance with Community Standards Bylaw 14600.

The City of Edmonton is working to reduce work-related impacts while keeping residents and business owners informed.

PLEASE RESPECT ALL SIGNAGE AND OBEY STAFF DIRECTIONS IN ACTIVE WORK ZONES.

Next steps

Once site preparation is complete, hazardous materials abatement is anticipated to begin. More information about this phase of the project will be shared prior to the start of this work.

Multiple infrastructure projects are underway in the surrounding community, including the Edmonton Spectrum Demolition (which is demolishing structures on the former Northlands Racetrack & Casino property). Additionally, the first phase of community development construction for the Edmonton Exhibition Lands development, including infrastructure upgrades at 79 Street and Borden Park Road, is underway.
